"POTENTIAL" Public Safety Power Shutoff (PSPS) Events for Southern California Edison (SCE) and San Diego Gas & Electric (SDG&E)

The California State Warning Center (CSWC) received notifications from Southern California Edison (SCE) and San Diego Gas & Electric advising they have notified customers of a *potential* Public Safety Power Shutoff (PSPS) due to an offshore wind event and critical fire weather conditions. CSWC has made notifications to State and Law Enforcement Agencies.

- The Cal OES State Operations Center is monitoring.

• SCE

- Per CUEA as of 11/13/18, 0635 hours, there are approximately 9,100 PSPS outages.
- SCE continues to monitor existing weather conditions as well as the Woolsey and Hill fires actively burning in the service territory.
- One circuit is partially proactively de-energized at this time (Anton circuit in Ventura County). Approximately 50 customers are impacted, and all appropriate notifications have been made.
- On 11/12/18, at approximately 2351 hours, SCE pro-actively de-energized a portion of the Energy 16kV out of Chatsworth Substation, de-energizing 35 customers. This circuit was previously identified for monitoring and customers were notified of the potential de-energization event. There were no identified critical care customers on the circuit.
 - 39 circuits were identified for monitoring 11/12/18 (with an additional 6 which would have downstream impacts) for potential de-energization. This list includes circuits in Riverside County, which has not previously been listed for potential impacts.
 - 49 circuits have been identified for monitoring on Tuesday, 11/13/18 (with an additional 6 circuits which would have downstream impacts) for potential de-energization.
 - Los Angeles, Orange, San Bernardino, Ventura, and Riverside counties have all been notified of identified PSPS circuits and are continuing to receive all associated maps and shapefiles as updates are made.
 - Customer notifications of PSPS de-energization and possible de-energization are ongoing.
 - Customers can find the most updated outage information on <https://www.sce.com/wps/portal/home/outage-center> or by contacting the SCE Customer Service Center at 1-800-655-4555.

• SDG&E

• Operational Update

- Per CUEA as of 11/13/18, 0635 hours, there are approximately 10,708 PSPS outages.
- SDG&E will activate its Emergency Operations Center (EOC) on 11/11/18 at 1700 hours and has planned the following operational periods:
 - Tuesday 0500 through 1700: Level 2 - Op Period 4 (Current Op Per)
 - Tuesday 1700 through Wednesday 0500: Level 2 - Op Period 5
 - Wednesday 0500 through 1700: Level 2 - Op Period 6
 - Wednesday 1700 through Thursday 0500: Level 2 - Op Period 7

WEATHER OF CONCERN

Northern California

- Dry weather with cool nights and above average high temperatures continues through the week.
- Diminishing winds ease critical fire weather conditions, but widespread smoke from the Camp Fire will continue to impact the area.

Southern California

- Moderate to locally strong Santa Ana winds will continue through today, especially over Ventura and Los Angeles Counties.
- Lighter offshore winds are expected Wednesday and Thursday.
- A switch to onshore flow and a return of the coastal marine layer will be possible Friday through next Monday.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

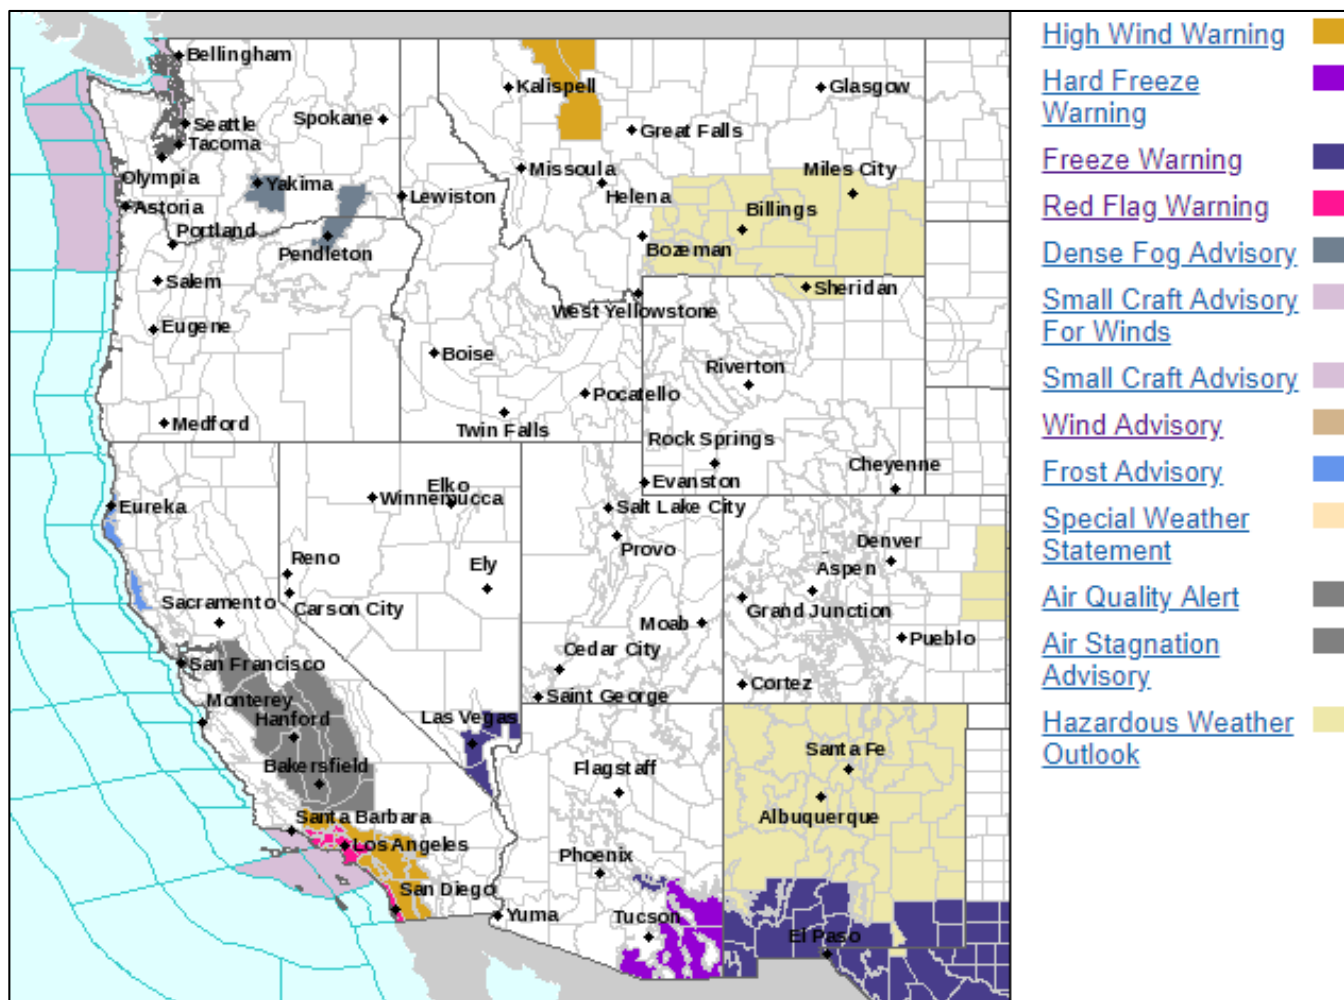

- While there will be much lighter winds the rest of the week, conditions will remain unseasonably mild and dry.
- High pressure will continue to produce warm, dry conditions into the weekend.
- No precipitation expected through Saturday at a minimum. Some may occur around Thanksgiving, but confidence in that event is low.
- Afternoon Relative Humidity (RH) will be low (5-15%) most afternoons this week with poor overnight recovery (5-25%) in many areas, particularly mid and upper slopes. Some valley locations that have been very dry may see RH will increase in a few days to afternoon minimums of 12-18% and overnight recoveries of 25-35%.
- Afternoon high temperatures will continue 5-10 degrees above seasonal normals with warmest inland areas mostly in the mid 70s. Overnight lows will be pretty close to seasonal values, and frost/freezing conditions are likely to become a bit more widespread.

SOUTHERN CALIFORNIA

- A ridge of high pressure will build into California from the Pacific Ocean and be directly overhead today. This ridge will then weaken slowly Wednesday through this weekend.
- Northeast winds of 20 to 40 mph with gusts to 60 mph will surface across much of Southern California through this morning. These northeast winds across Southern California will weaken to 15 to 25 mph with gusts to 40 mph this afternoon through Wednesday afternoon. Only local gusty offshore winds are expected across Southern California Wednesday evening through Thursday morning. Winds will be light across the region Thursday afternoon through this weekend.
- Widespread single digit minimum humidity along with very poor nighttime humidity recovery will continue through Friday. Minimum humidity will increase into the teens with better humidity recovery at night this weekend.
- Temperatures will be near to a little below normal across the mountains through this weekend, with upper 40s and 50s. Temperatures will be near to a little above normal in the valleys through this weekend, with 70s to low 80s.
